Mohammad Asad

Data Analyst · Working Student
Magdeburg, Germany | +49 155 10212084 | asad.md2508@gmail.com | linkedin.com/in/mohammad-asad-a107941b6

Profile

M.Sc. Digital Engineering student at OvGU Magdeburg with 18 months of industry experience in content and data analysis. Comfortable with SQL, Python, and Excel for cleaning, analysing, and reporting on data, with a hands-on background in SEO and Google Analytics. Looking to contribute as a Working Student Data/Business Analyst and to keep growing in Germany long-term (German: B2, actively improving).

Education

Otto von Guericke University Magdeburg — Magdeburg, Germany
M.Sc. Digital Engineering — *Oct 2024 – Present*

Jamia Hamdard University — New Delhi, India
B.Sc. Computer Applications (BCA) — *Aug 2020 – Aug 2023*

Skills

Data & Analytics: SQL (PostgreSQL), Python (pandas, matplotlib), data cleaning, exploratory data analysis
Machine Learning: scikit-learn, feature engineering, model deployment (Streamlit, AWS EC2)
Reporting: Excel (pivot tables, reporting), Power BI (basics), Google Analytics
Tools: Git/GitHub, Jupyter, WordPress
Languages: English (C1), German (B2), Hindi/Urdu (native)

Work Experience

Content Analyst — Jun 2024 – Jan 2025
Cognizant — *Gurgaon, India*

- Evaluated 300+ web content pieces weekly against Google's quality guidelines (EWOQ), sustaining platform accuracy above 95% and a personal accuracy score above 97%
- Built structured Excel reports on content trends and quality metrics that team leads used in weekly prioritisation decisions, collaborating with 50+ analysts across time zones

Data Analyst — Aug 2023 – May 2024
Aaban Solutions — *Gurgaon, India*

- Analysed website content from 100+ sources to surface user-behaviour and engagement insights that informed client content strategy
- Maintained databases of 50,000+ records and restructured entries for faster retrieval
- Automated data cleaning and summarisation in Excel, cutting manual reporting time by ∼30% and reducing errors in client deliverables

Projects

Price Prediction Models (Machine Learning) | *Python, scikit-learn, Streamlit, AWS* — Jan 2023 – Jun 2023

- Built and deployed 3 ML models (laptop, car, and property price prediction) trained on Kaggle datasets, applying data cleaning, exploratory analysis, and feature engineering to improve accuracy
- Hosted the models on AWS EC2 and integrated them with a WordPress website via API
- Designed a Streamlit front-end so anyone can get a price estimate by filling in a simple form

WordPress Websites & SEO Content | *WordPress, Google Analytics, SEO tools* — Jan 2023 – Present

- Designed and launched multiple WordPress websites and blogs for marketing purposes
- Grew organic traffic through regular SEO-optimised posts, keyword research, and on-page optimisation
- Tracked performance in Google Analytics and used the data to refine content strategy over time
